

Sports halls and handball stickers

The quality of the wall in sports halls is not just about its ability to cope with hard punches but equally its ability to meet the demands of a reduced cleaning and maintenance. Our surfaces meet these requirements and, for example removal of handball stickers will no longer be a major challenge for a custodian or cleaner. So by using our wall and ceiling solutions it combined all requirements to high strength, easy cleaning and reduced maintenance. Picture of the new Sande in Vestfold, Norway.

AGRICULTURE SELECT ALSO WALLS AND CEILING WITH STRENGTH AND HYGIENE.

Farmers in many countries have experienced how well-being increases for both humans and animals when premises appear clean and hygienic over time. In addition, you get a reduced maintenance and far better illumination without investments because of the bright surface. It also turns out that diseases of animals is reduced because our surfaces are 100% watertight

and the fact that the surface coating is not conducive to bacteria growth. In barns, stables, pigsty, milking station and breeding farms, this solution provides a reduction in maintenance, a far easier cleaning and not least the workplace appears to be far more attractive and pleasant.
