

LIFE CYCLE COSTS REGARDING FRP PANEL

THE PICTURE SHOW HOW A HOUSE
BLOCK LOOKS AFTER 45 YEARS.

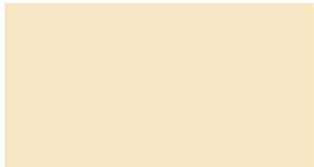

This residential block in Tjølling, Norway
Was built in 1968 and has not been renovated since.
Our FRP cladding panels will remain the same for the next 45 years to come.

LIFE CYCLE COSTS REGARDING FRP PANELS

Sixteen houses blocks in Tjølling with FRP cladding panels seen from north/east.
Picture taken in august 2013.

Smooth FRP panels with different colour are used. Smooth panel on the balcony front and aggregate panels on the buildings walls.
